

BULK TEQUILA

Quality Bulk Tequila, Built for Consistency at Scale.

A clean, consistent tequila profile for bottling abroad, backed by agave supply, production capacity, and export-ready coordination from origin.

NOM 1633 • CRT AUTHORISED • HIGHLANDS OF JALISCO • AGAVE ROOTS SINCE 1992

Casa Loy Tequilera is a family-owned tequila producer in Ayotlán, in the Highlands of Jalisco, one of seven companies owned by the Loy family, and the only one with the name. We have been growing agave since 1992, long before we distilled our first liter, and today we hold eight million agave plants on land we own across Jalisco, Michoacán, and Guanajuato.

Every batch is built for consistency at scale, backed by agave supply and production capacity to support long-term bulk programs. We also help coordinate the export pathway from origin, so your shipment moves with clarity.

Bulk tequila that protects the brand you're building: clean profile, reliable supply, repeatable batches.

AVAILABLE BULK PROGRAM

CATEGORY	CLASSES	STRENGTH	PRESENTATION	USE
Tequila Mixto (51% agave, 49% other sugars)	Blanco / Reposado	55% Alc. Vol.	Isotank (21,000–26,000 L) or IBC totes (1,040–1,250 L)	Bottling abroad / RTD

EXPORT-READY COORDINATION, FROM ORIGIN

01

Project & brand review: we align on your target profile, market, and volume before production begins.

02

Regulatory documentation pathway: Linkage Agreement, Bottler Approval Certificate, and CRT registration coordinated for your shipment.

03

Production, lab release & inspected loading: produced against your approved sample, released by our laboratory, and loaded under regulatory inspection.

Working with Casa Loy

WHY CASA LOY BULK TEQUILA

Quality Mixto for bottling abroad

Tequila 100% Agave must, by law, bottle inside Mexico's Denomination of Origin zone. Mixto is the category that allows bottling abroad.

Market-aligned profile

We can work from your target profile or reference sample to align the liquid with your market.

Built for consistency at scale

European automated column distillation, designed for repeatable batches and long-term volume programs.

Agave-backed production

Grown on land we own since 1992, giving us the agave supply and production capacity to support growing demand.

✦ Can I use it for RTD canned cocktails?

Yes, same clean profile, same CAE compliance.

✦ Can I bottle my own tequila brand?

Yes. Work with an authorised bottler in your market; we supply the compliant bulk shipment, and they bottle and label under your brand.

We help you avoid label rejections: we review your final product label's use of "Tequila" and related terms against destination rules before bottling. Official fees, filings, brokers, freight, and insurance are coordinated or quoted separately according to your project.

Consistency at scale, built into every batch.

CERTIFIED QUALITY

CRT verified · CAE certified.

We stay on top of every shipment: we coordinate directly with your freight forwarders and customs brokers, origin to destination. If something needs attention, like a delay or a hold at customs, you hear about it before it affects your timeline, not after.

Ex Works Ayotlán

You choose your own freight forwarder, insurer, and logistics partners. We provide the export documentation and origin coordination for every approved load.

13.5M L / 8M plants

Annual production capacity, from agave growing since 1992

Estimated readiness: 20 business days

From confirmed order to product ready for collection, once set up. Forecast-based programs may allow faster availability.

Let's talk volume, profile, and price.

Send us your target market, estimated volume, desired profile, and timeline. We will be direct about the best route, sample path, pricing structure, and export requirements.
